Full Stack React and Node developer nearly 4 years of experience focused on performance, and self-mastery in solving problems through clean and readable code for the smooth functioning of the application, proactive with quick ability to learn new technologies and always willing to learn every day and grow in this world of technology.

Key Technologies

- JavaScript
- Reactjs
- Nextjs

- TypeScript
- Express
- MYSQL
- Vuejs

- PostgreSQL
- MongoDB
- Nodejs

Complementary Technologies

During development I use certain libraries for most systems, some of them are:

- API Context
- Axios
- Material-UI
- Styled-components

- Tailwind-CSS
- Jotai
- Lucide-react
- React-icons

- Pinia
- Mantine-UI
- Vitest
- Jest

Skills

- Create code readable to other developers.
- Find bugs and propose action plans for remediation.
- Working as a team.
- Creative thinking.
- Follow instructions and deliver quality results.
- Good ability to work with new technologies.
- Willingness to continue learning.

Experiences

JUNE 2022 – AUGUST 2022

Front End Developer / My Portfolio

Responsible for creating and maintaining a project aimed at showcasing my skills in a professional manner, highlighting my style as a programmer. Additionally, I have other projects available on my GitHub to further demonstrate the breadth of my work.

NOVEMBER 2022 - CURRENTLY
Full Stack Developer / Freelancer Standalone

Responsible for the complete development of the project, including creating plans, setting goals, and establishing timelines to ensure on-time completion. I provide support in conflict resolution, aiming for negotiations that benefit all parties involved and ensuring that client needs are fully met.

JANUARY 2024 – CURRENTLY
Front End Developer / Bantu Internet Technologies

Responsible for developing interfaces and front-end architecture, focusing on solutions that meet client needs and ensuring the delivery of a high-quality product. Additionally, I support in resolving technical issues and implementing continuous improvements to enhance the user experience.

Academic Training

JANUARY 2018 - APRIL 2022
Management Information Systems / Polytechnic Institute of Administration and Management of Catumbela

During my first year of high school, I had my first experience with programming through studying algorithms, and I quickly became captivated by the field. As the year progressed, I found the material increasingly basic for my level, which motivated me to seek additional knowledge. By the end of the year, I encountered HTML and CSS for the first time, subjects that, at school, were only scheduled for the third year. I began creating some layouts, and in my second year, I was determined to deepen my skills independently, beyond the school's introductory content. I then started studying JavaScript, practicing with exercises to further improve my skills. Thanks to this progress, I had the opportunity to contribute to the development of our final course project.

Complementary Activities

- I helped develop the front-end of our end-of-course project.
- I've been helping and motivating friends to get interested and join the area.
- I've been helping developers with code reviews, bug fixes, tips for improving code, and even helping them take the next steps.

Languages

- Portuguese (Native)
- Intermediate English

Hobbies

- Programming and studying interesting technologies and concepts from the tech world is without a doubt my greatest hobby.
- Watch movies, and series. I love science fiction and romance.

- Listen to music.
- Read a novel, science fiction, or a social book.
